Information

At Utopia we recognise the difficulties that some young people face in large classroom environments and as such we have developed a 1:1 tutoring provision that enables us to provide the necessary intervention for those with additional needs. Our experienced teachers provide intensive support towards functional skills and GCSE qualifications by working in partnership with English and Maths departments in schools. They have experience in teaching across various exam boards and ensure that syllabus requirements are met in conjunction with the appropriate specifications.

Utopia's 1:1 English and Maths provision supports KS4 students by;

- ✓ addressing skills gaps and building confidence
- ✓ developing essential skills in both subjects
- ✓ preparing them for GCSE qualifications, through sessions that are tailored towards individual learner needs.
